

# PhotoContest Pro

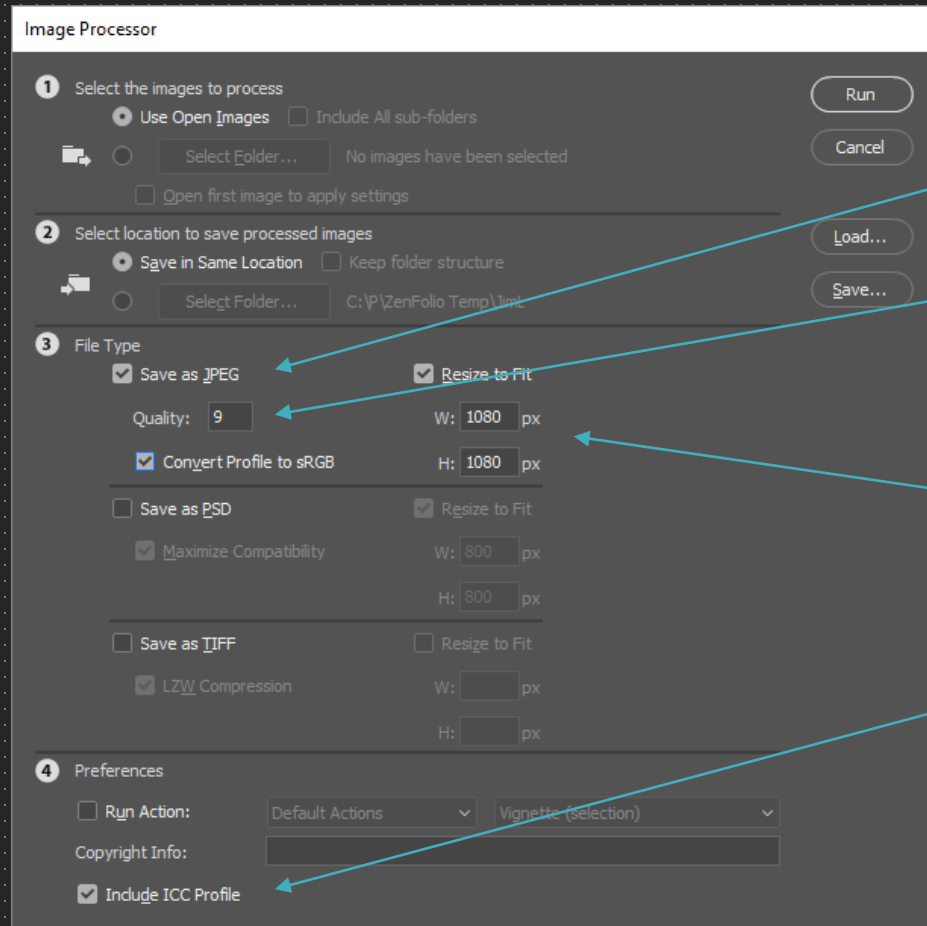

## Image Submission Guidelines

# Image Preparation

- Images should be prepared for projection
  - Image format must be jpg and color space should be sRGB
  - Size approximately 1080 pixels in the longest dimension
    - Small variations in this size have no visible effect
  - A thin border often helps separate the picture from the black background.
    - White or nearly white is the best color choice
    - Wide or decorative borders are not allowed.
    - Rounded corners are not allowed.

# Image Preparation

- Easy way to prepare images in Photoshop
  - File->Scripts->Image Processor

File type must be JPEG

Quality > 9 makes for big files with no improvement in quality

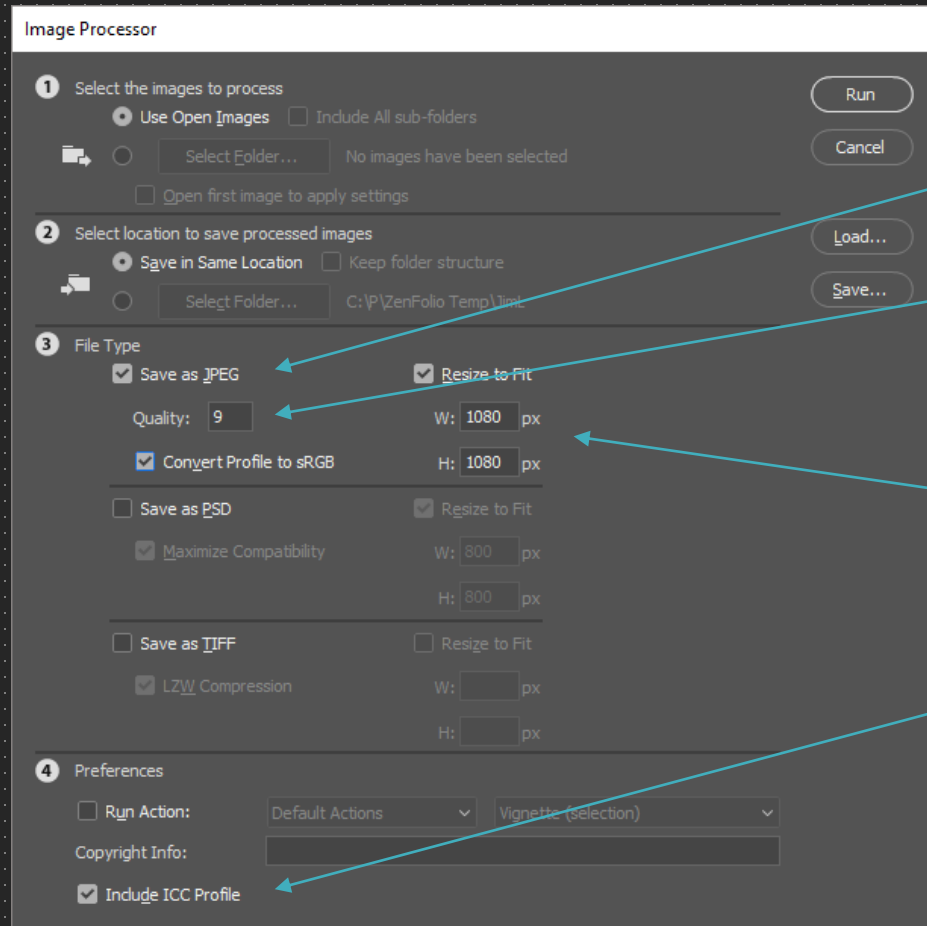

Specify max width and height (1080)

Insures that Windows respects the color profile

These settings are STICKY

# Image Preparation

- Easy way to prepare images in Bridge
  - Tools->Photoshop->Image Processor

File type must be JPEG

Quality > 9 makes for big files with no improvement in quality

Specify max width and height (1080)

Insures that Windows respects the color profile

These settings are STICKY

# Image Preparation

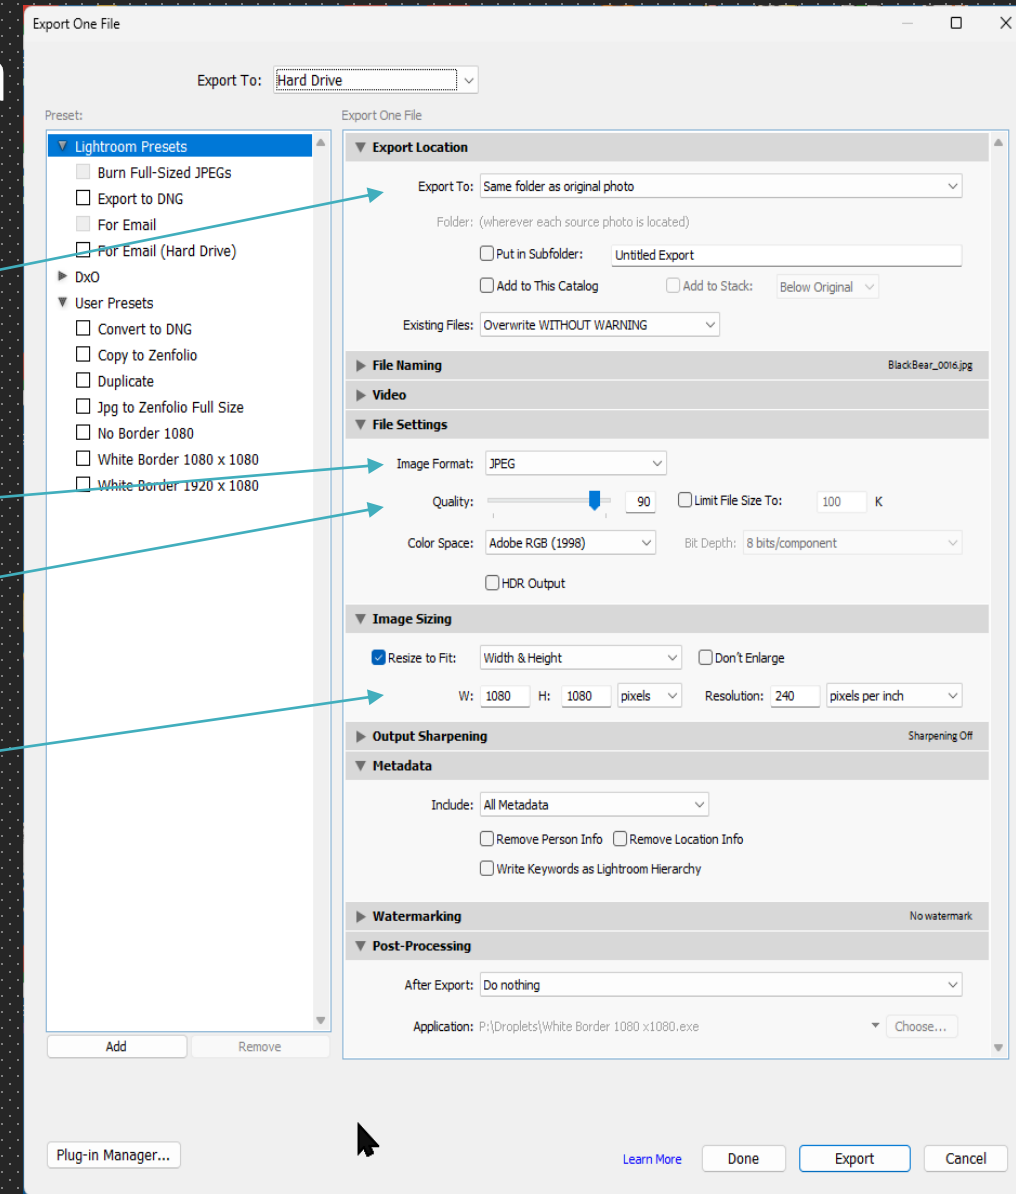

- Easy way to prepare images in Lightroom
  - In Library module, File -> Export

File Location

File type must be JPEG  
Color Space sRGB

Image Quality (90)

Specify max width and height (1080)

# Image Submission

- There are two different methods for submitting images
  - Method 1 installs a program on your computer which is used to submit images. This is the preferred method but only works on Windows.
  - Method 2 works in modern browsers and on all operating systems. This method is not as feature rich or as robust as Method 1.

# Image Submission

The screenshot shows a web browser window with the address bar displaying "photocontestpro.com/UploadPictures.aspx". The browser's toolbar includes navigation buttons (back, forward, refresh, home), a search bar, and a list of bookmarks (KCCNY Home, Google, Gmail, Google News, Optimum Webmail, Optimum Voice). The website header features a logo on the left, the title "PhotoContest Pro Version 4" in the center, and a welcome message on the right: "Welcome Jack Moskowitz, Camera Naturalist Photo Club Administrator, Global Administrator". Below the header is a navigation menu with links: Home, Submit Pictures, Downloads, Purchasing, Privacy Policy, and Contact Info. The main content area is enclosed in a large box and contains the following text:

PhotoContest Pro provides two methods for submitting pictures to contests. Note that these methods have changed recently.

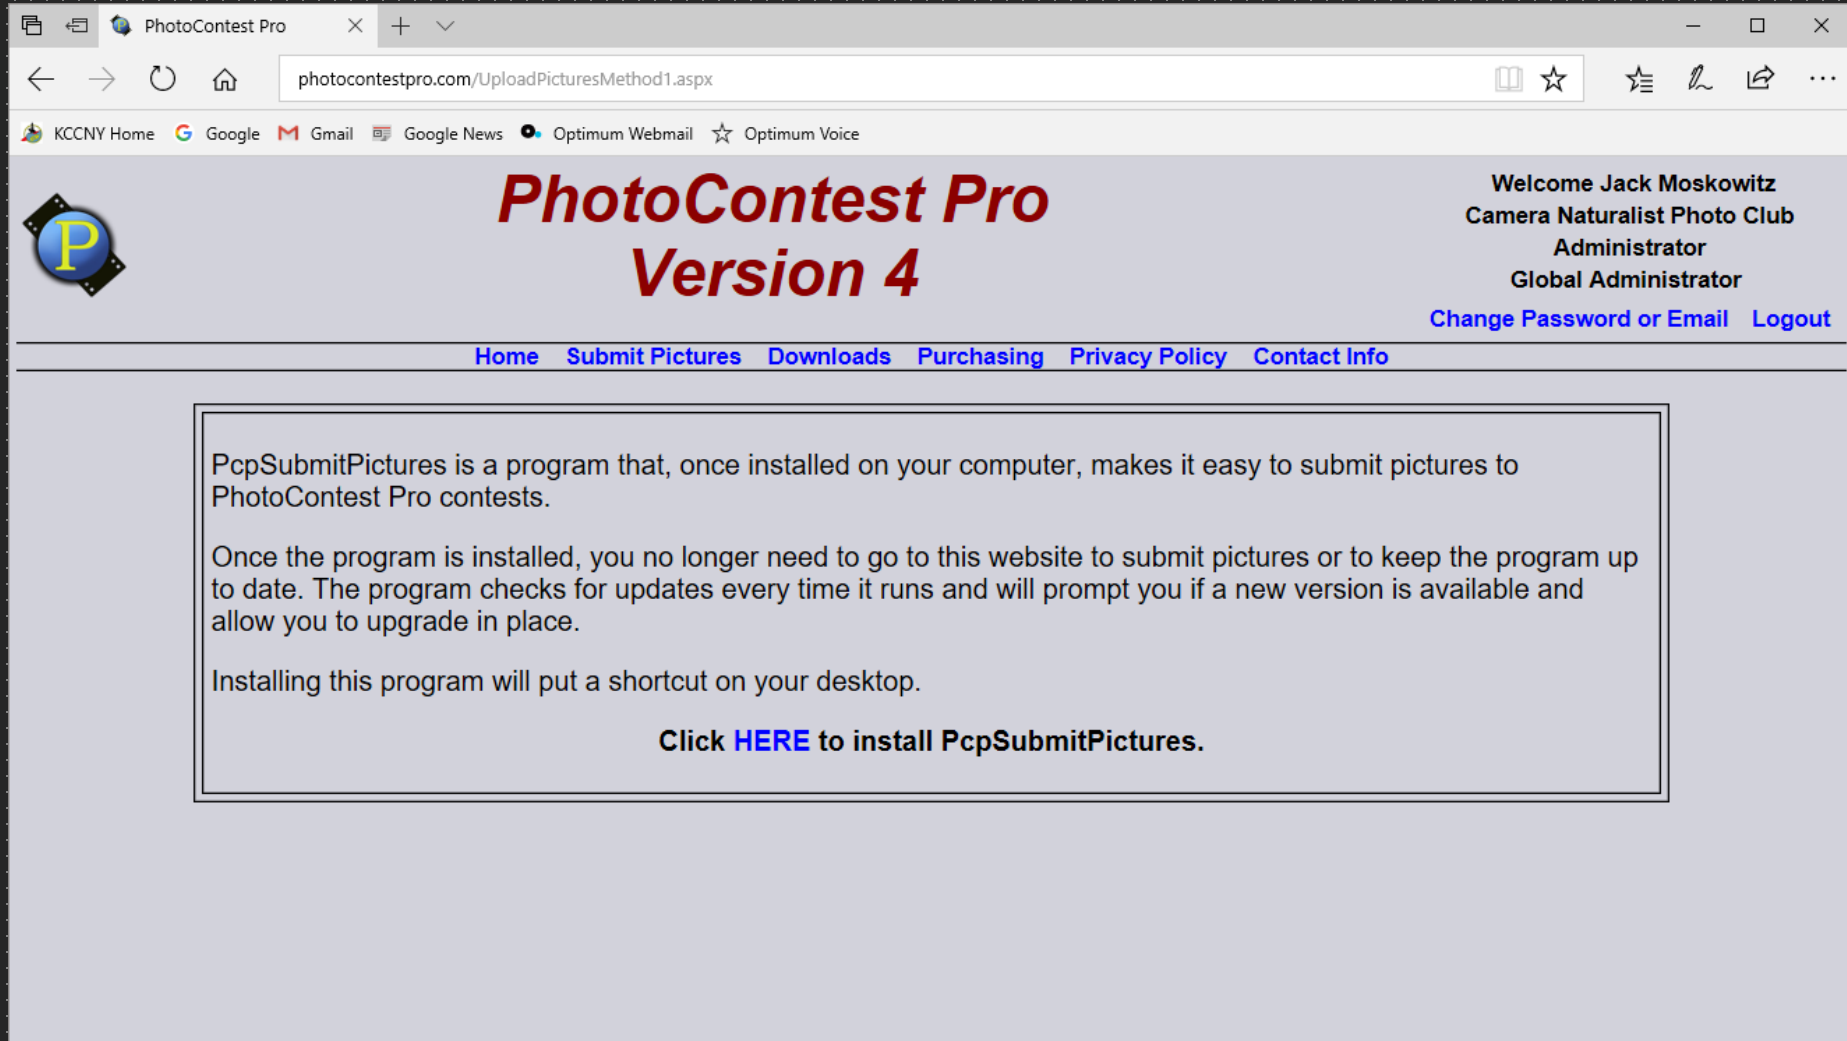

Method 1 is the preferred method as it provides more features and a better experience. Method 1 is an installed program on your computer. It only runs on computers running the Windows operating system.

Method 2 is a direct upload and works on nearly all combinations of browsers and operating systems. Method 2 has fewer features than Method 1 and should only be used if you can't get Method 1 working.

At the bottom of the page, there are two buttons for proceeding to the submission methods:

- Proceed to Submit Pictures Method 1** (recommended method)
- Proceed to Submit Pictures Method 2** (fallback for when method 1 won't work)

# Image Submission (Method 1)

The screenshot shows a web browser window with the address bar displaying `photocontestpro.com/UploadPicturesMethod1.aspx`. The browser's address bar also shows several search engines: KCCNY Home, Google, Gmail, Google News, Optimum Webmail, and Optimum Voice. The website header features a logo on the left, the title **PhotoContest Pro Version 4** in the center, and a welcome message on the right: **Welcome Jack Moskowitz**, **Camera Naturalist Photo Club**, **Administrator**, and **Global Administrator**. Below the welcome message are links for [Change Password or Email](#) and [Logout](#). A navigation bar below the header contains links for [Home](#), [Submit Pictures](#), [Downloads](#), [Purchasing](#), [Privacy Policy](#), and [Contact Info](#).

The main content area is enclosed in a double-bordered box and contains the following text:

PcpSubmitPictures is a program that, once installed on your computer, makes it easy to submit pictures to PhotoContest Pro contests.

Once the program is installed, you no longer need to go to this website to submit pictures or to keep the program up to date. The program checks for updates every time it runs and will prompt you if a new version is available and allow you to upgrade in place.

Installing this program will put a shortcut on your desktop.

Click [HERE](#) to install PcpSubmitPictures.
